Education

Benemérita Universidad Autónoma de Puebla (BUAP) Puebla, Mexico

- **Degree:** B.S. in Computer Science (Active Student). **Graduation Date:** July 2027
- **GPA:** 8.81/10 **Credits Completed:** >75%
- **Relevant Coursework:** Software Engineering • Data Mining • Database Systems • Object-Oriented Programming • Computer Architecture • Distributed Systems

Technical Experience & Key Projects

SWAP IT (Circular Economy Web Platform) Puebla, Mexico
Project Lead June 2026 – July 2026

- Led a multidisciplinary team using Agile (Scrum) methodology to develop and deploy a web application focused on electronic component (e-waste) exchange and management.
- Coordinated platform adoption within the university community, managing 100 active users and drafting executive documentation for potential investors.

Libraries, Archives, and Museums Hackathon (BAM) Puebla, Mexico
Technical Lead & Data Engineer June 2026

- Directed the development of an interactive web platform ("Radar Cultural") focused on the efficient visualization of institutional data.
- Implemented web scraping techniques and ETL pipelines for complex data extraction and structuring, acting as a technical liaison between engineering and business teams.

Comprehensive Computer Service Center (CSIC) Puebla, Mexico
IT Support & Maintenance April 2025 – Present

- Execute advanced diagnostics, preventive/corrective maintenance, and hardware upgrades for institutional computer equipment.
- Manage and resolve operating system (Windows/Linux) incidents, ensuring continuous technological operability and providing effective support for university users.

Certifications & Analytical Training

Data Science Diploma | BUAP - FCFM January 2025 – May 2025

- Implemented and evaluated Machine Learning models (classification and clustering), leveraging the BUAP supercomputer to process and analyze large-scale datasets.

IBM SkillsBuild: Data Analytics & AI | IBM May 2026

- Integrated enterprise tools such as IBM Cognos Analytics for data visualization, workflow management, and applying agile methodologies in real-world scenarios.

Microsoft Office Specialist: Excel Expert May 2026

- Practical certification in advanced spreadsheet simulation, data modeling, and large-scale data analysis tailored for corporate environments.

Technical Skills & Competencies

Languages & Tools: Python, SQL, C/C++, R, MATLAB, Advanced Excel, IBM Cognos, Flutter, Git.
Infrastructure & Networks: User IT Support, Operating Systems (Windows/Linux), Hardware Troubleshooting, TCP/UDP.
Competencies: Project Management (Scrum), Agile Methodologies, Problem Solving, Data Analysis.
Languages: Spanish (Native), English (B1 - Intermediate).
